GREGORIUS GERALDIN
Full Stack Developer

Jakarta, Indonesia | +62 858-9110-3121 | gregorius.gerald21@gmail.com | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Full-Stack Web Developer and Computer Science fresh graduate with one year of mobile development experience and recent completion of Purwadhika's Full-Stack Web Development Bootcamp. Comfortable using JavaScript, React, Next.js, Node.js, Express.js, and PostgreSQL. Passionate about building scalable web and mobile applications, continuously learning through real-world projects, and growing through team collaboration.

WORK EXPERIENCE

Bina Nusantara University   Feb 2023 - Feb 2024
Mobile Apps Developer Intern

- Built mobile apps using Java to support MSME operations across Indonesia focusing on responsive UI and essential business features.
- Resolved 10+ major bugs and integrated RESTful APIs with cross-functional teams.
- Collaborated with the UI/UX team to deliver 5+ interface improvements based on feedback from 200+ testers.
- Worked in Agile sprints, joined daily stand-ups and weekly syncs, using Trello to improve coordination and ensure on-time delivery.

PROJECT EXPERIENCE

Property Renting Web App (Purwadhika Final Project)

- Built a role-based authentication system for tenants and landlords with JWT, email verification and social login, ensuring secure multi-role access.
- Developed Property and Room Management (CRUD, seasonal pricing, availability) with Express.js, Prisma, PostgreSQL to simplify operations for landlords.
- Implemented a responsive landing page and property search in Next.js with server-side filtering and pagination, improving performance and user experience.

Cashier App (Purwadhika Project)

- Built a full-stack POS system with role-based access for admin and cashier using Express.js, Prisma, and PostgreSQL, ensuring secure and reliable access.
- Developed product, transaction, and cashier management with shift tracking and sales reports to ensure accurate and transparent daily sales monitoring.
- Designed a responsive UI with Next.js and TailwindCSS, improving usability and maintaining a clean, scalable architecture.
